

FAQ

1) Do you need the ³lump sum² amounts for onsite training to include travel and expenses?

Yes.

2) Does the line on the pricing for ³Autodesk Maintenance and Support Fee² for Autodesk 2014 need to include all the licenses currently assigned to City of Alexandria? Or does this mean general vendor support for all the existing Autodesk products (but not necessarily the Maintenance fee for the actual licenses). Same thing for Oracle?

Just General Vendor Support for Autodesk products and Oracle.

3) For the onsite training for AIMS and Map 3D - these items seem to be listed in the RFP as being trained on together, but should they be two separate engagements/visits?

That sounds good just make the adjustments to reflect that on the pricing sheet.
