

City of Alexandria  
Annual Capital Budget  
and Five Year Plan  
2008-2009

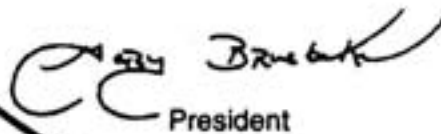

GOVERNMENT FINANCE OFFICERS ASSOCIATION

*Distinguished  
Budget Presentation  
Award*

**PRESENTED TO  
City of Alexandria,  
Louisiana**

**For the Fiscal Year Beginning  
May 1, 2007**

  
President

  
Executive Director

The Government Finance Officers Association of the United States and Canada (GFOA) presented an Award of Distinguished Presentation to the City of Alexandria for its annual Budget for the fiscal year beginning May 1, 2007.

In order to receive this award, a government unit must publish a budget document that meets the program criteria as a policy document, as an operations guide, as a financial plan, and as a communication device.

The award is valid for a period of one year only. We believe our current budget continues to conform to program requirements, and we are submitting it to the GFOA to determine its eligibility for another award.

<b><u>R. FIVE YEAR PLAN</u></b>	

The City's Administration and the City Council reassessed the entire capital improvements budget in Fiscal 2006-2007. The new concept is called Fast Track. It was observed that more projects were being placed in the budget than could be practically funded, given the City's limited resources. This was particularly true in the Drainage and Streets sections of the budget. Priorities were set and the total number of projects not yet underway was limited to 40. This greatly reduced the number of projects listed and allows the City to sharpen its focus and commit its financial and other resources to attainable results that will have greater impact to the citizenry, along with great economic impact. Some of the major projects include the extension of Versailles Boulevard, reconstruction of Sugarhouse Road, and 6<sup>th</sup> and 7<sup>th</sup> Street connection from Cotton Street to Monroe Street. These will greatly improve transportation in 3 different areas of the City, and should stimulate economic development. As projects are completed, they will be replaced with new ones as funds become available. This strategy continued through the 2007-2008 Fiscal Year and is planned for Fiscal Year 2008-2009, with substantial appropriations for the major projects listed.

### Enterprise Capital Projects

The following is a breakdown of the Enterprise Capital Projects by Category:

Category	No. of Projects	Total
Electric	10	\$2,289,246
Water	10	957,000
Gas	1	160,000
Wastewater	8	1,100,000
Other	3	865,000
Municipal Transit	<u>0</u>	<u>-0-</u>
Total	<u>32</u>	<u>\$5,371,246</u>

The Enterprise Capital Projects are funded by revenues generated by the City's Utility System, a Utility Revenue Bond issue, and matching FTA grants.

At present, the City is engaging consultants to assess the needs of its Utilities System infrastructure. This will assure the ability of the 4 components; electricity, gas, water and wastewater, to provide reliable service to the customer at the existing level of service as well as provide for any anticipated growth in all areas. This assessment will materially impact future capital budgets in the Enterprise Capital Projects.

Sincerely,

David Crutchfield  
 Director of Finance  
 City of Alexandria

**City of Alexandria  
Five Year Capital Improvement Program  
Glossary of Terms**

**Revenue Terms:**

**Community Development Block Grant (CDBG)** - Revenue received from the Community Development Block Grant source via the City's Community Development department.

**Federal Grants** - Revenue received from the U.S. Government, or as a Federal pass-through grant from the State of Louisiana.

**Property Taxes** - Revenue from the 11.25 millage 1993 Streets and Drainage Tax.

**Sales Tax (STX)** - Revenue from the City's Capital Outlay Fund supported by the 1/2 cent sales tax.

**Sales Tax Bonds (STXB)** - Revenue from sales tax bonds.

**Special Assessments (ASMT)** - Revenue received from the legal process of assessing benefitted property owners or physical improvements such as sewer lines or street improvements such as sewer lines or street improvements.

**State Grants** - Funds received from the State of Louisiana, excluding pass-through grants.

**Utility Revenue Bonds (RB)** - Revenue from the sale of Utility Bonds.

**Expenditure Terms:**

**Construction** - Contracted cost associated with the actual implementation or construction of an improvement. This should include material costs associated with projects utilizing city crews for implementation.

**Demolition Cost** - Contract cost associated with demolition or site preparation.

**Engineering/Architectural Design** - Any cost related to the design phase of the project either by the city or private firm.

**Inspection Fees** - Costs of providing for project inspection usually performed by the design engineer.

**Land Acquisition** - Any cost associated with the acquisition of property to implement the project. It includes, but is not limited to, condemnations, right-of-ways, legal costs, etc.

**Landscaping** - Costs associated with miscellaneous grading and landscaping activities incidental to the construction activity. Landscaping for parks should be shown in the construction classification.

**Major Equipment** - Costs associated with movable or immovable equipment, generally costing over \$5,000 and having a useful life of five years.

**City of Alexandria  
Five Year Capital Improvement Program  
Glossary of Terms**

**continued**

**Miscellaneous Definitions:**

**Activity** - A service performed by a department or division.

**Appropriations** - Authorization granted by the City Council to make expenditures for a given period and the proposed means of financing them.

**Assessments** - An amount levied on personal property on a cost sharing basis for improvements made by the city for the benefit of a small group of property owners (e.g. Special Assessments for the reconstruction of a sewer line in a lightly populated area).

**Budget Carryover** - The total of the current budget, April 30, minus prior year(s) expenditures.

**Capital Budget** - The City's five year financial plan that contains both the estimated revenues to be received and the proposed Capital expenditures to be incurred to achieve a stated objective.

**Department** - A section of a Division.

**Division** - A functional unit of the City containing one or more departments or activities.

**Fund** - A fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, together with all related liabilities and residual equities or balances, and changes therein, which are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions, or limitations.

**Fund Balance** - Resources remaining from prior years which are available to be budgeted in the current year.

**Fund Source** - The source of Revenue used to pay for a particular project.

**Ordinance** - A formal legislative enactment by the governing body of a municipality.

**Project** - A large or major undertaking designed to achieve an objective.

**Project Category** - The functional improvement category under which a project is assigned, (e.g., Public Enterprise, Economic Development, Streets, etc.).

**Urban Systems** - Federal funded street projects that match local funds for the reconstruction of major streets.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

This project is being created in order to facilitate the coordination of appropriations necessary for the relocation of Utilities due to Street and Drainage projects. The Utility Fund will allocate funds to be used for utility relocations associated with Street and Drainage Projects proposed in the 1988 and 1993 Property Taxes. An amendment will be required to transfer the appropriation to the appropriate project.

## PROJECT JUSTIFICATION:

The establishment of this flow through project allows for better coordination between the Utility Fund and the General Fund on projects associated with the Property Tax projects.

## PROJECT PRIORITY:

A

## START DATE:

May, 1993

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Construction or renovation of existing structure for a new, centralized customer service center.

## PROJECT JUSTIFICATION:

Presently, primary customer contact is at two sites. This new facility will place the functions handled at the Utility Customer Service Office and the Business Office, at one location, providing the public with "one stop shopping" for payment and services regarding utilities, property taxes, occupational licenses, and the like. It will also provide the City with the inherent efficiencies of a single operation.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

1. To provide for a covered drive through unloading animals and adequate quarantine areas
2. To provide a building for both the old and the new cremators
3. To provide for a new cremator.

## PROJECT JUSTIFICATION:

An enclosed building is needed to perform the task of disposing of euthanized or discarded animals, both for the City and surrounding areas. Currently, animals are unloaded in the weather and in full view of the public. Disposal of animals is unpleasant but necessary, and comes with many criticisms and public relation concerns. The new building will provide seclusion and weather protection while loading and unloading impounded animals, some of whom are vicious and pose a threat during the process. The additional cremator will allow extra volume and be a backup to the existing unit in case of failure.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Phase 1. Replacement of Track door system that splits Convention Hall for Rentals, potable boiler  
Phase 2. Electrical Renovations to Architectural Lighting, dimming systems and Technology upgrades  
Phase 3. Wall resurfacing to create a more acoustically and aesthetically pleasing facility.  
Phase 4. Upgrade existint to meet current NFPA Fire standards.

## PROJECT JUSTIFICATION:

This venue is in dire need of upgrading. It has stood the test for 45 years but now has become very dingy and in need of updating  
Parts are no longer available for the dimming system and the acoustics are very distracting and unacceptable for a "party"/"conv"  
venue. Technology changes and pressures make the venue not competitive without enhancements.

Replace HVAC at City Hall

Phased replacement of 28 split HVAC systems at City Compound

Phased replacement of HVAC water source heat pumps at Customer Service Center

Door replacements and foundation work at City Compound

**PROJECT JUSTIFICATION:**

Because of the cost involved in repairing and updating antiquated or deteriorated equipment or structures, Public Works has developed a plan to progressively make the necessary repairs. The implementation of this plan will ensure the service levels currently provided to the citizens are maintained. This plan helps to defray the costs over a period of several years.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Replace roofs on different buildings as needed.

A partial list of roofs that need replacement or renovation is:

Jakes Building, Bringham Theater, Bolton Community Center, Martin Community Center, Treehouse,

## PROJECT JUSTIFICATION:

As roofs age they begin to leak. Failure can be predicted through core sampling and analysis. This project will provide funding for the testing and the replacement if indicated.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Replace deteriorated roof and deteriorated boards on breezeway between the Arts Studio and Bolton House

## PROJECT JUSTIFICATION:

The breeze way scuppers allowed water to back up under roofing allowing for the deterioration of the deck boards. The roof will have to be removed to replace these boards. Although the roof itself does not leak the replacement of these boards will require roofing replacement. A contractor estimate of 37000 was given to the City.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Replace outdated and non-supported operating and control system.

**PROJECT JUSTIFICATION:**

The existing computer and control system is over 10 years old and DOS based. It requires frequent calibration and repairs performed by certified technicians. The system is unreliable and frequently fails to start or stop the HVAC system. The computer that runs the operating system programs ceases to function on a routine basis and has to be restarted. Upgrading this system will also require the remote operating control components to be replaced.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Extend the Fueling Depot Canopy to cover all pumps.  
Retrofit/replace obsolete Petrovend POS systems.

## PROJECT JUSTIFICATION:

The City is required to operate the City Complex under a LDEQ stormwater discharging permit. The permit specifically regulates the discharge from fueling operations and places numerical limits on pollutants that can be discharged such as oil and grease. Initial testing showed the Fuel Depot to be out of compliance. A cover must be constructed over the fueling area to minimize the discharge of petroleum products to the storm drain system.

**PROJECT DESCRIPTION:**  
 ID Prox Card access systems for gates & turnstiles  
 CCTV System Improvements  
 New vehicle gate operators and renovations

**PROJECT JUSTIFICATION:**  
 The City Compound houses most of the critical operations of the Public Works Division and some operations of the Utilities Division. There is a considerable investment in equipment and supplies that needs further securing. Existing CCTV system is outdated, inadequate, and is down for repair frequently. Existing gate operators are 15 years old, and should be upgraded with the proposed 24/7 automatic operation. The Card Access System will integrate with the city wide keyless security system to provide tighter control and reporting of access.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Reconstruction of concrete slope pavement located at 16th Street Flood Gate Out Fall Structure.

## PROJECT JUSTIFICATION:

During the construction of Flood Control improvements at the 16th Street Flood Control Structure we noticed failures to the existing slope pavement. Prior to the completion of this project several concrete panels failed due to tremendous voids under the pavement. The concrete pavement needs to be replaced soon to prevent erosion in this area and possible liability to the City in the event someone falls on the pavement.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Installation of 48", 36" 24" and 18" RCP pipe, catch basins and additional drainage appurtenances.

**PROJECT JUSTIFICATION:**

Property is being developed along Winderemere Boulevard and the existing drainage system will not accommodate present development. There is only one vacant parcel of land located between the Diversion Canal and Winderemere Boulevard in which drainage improvements can be placed on without major construction cost.

Proposed drainage improvements should be ample to handle the proposed development for the remainder of this area.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Installation of 15", 18", 24" and 36" RC pipe; catch basins; reshaping existing ditch; reconstructing McDonald Street with 6" concrete pavement 24 feet wide, relocating existing utilities, and installing all additional appurtenances required to construct this project.

## PROJECT JUSTIFICATION:

City has received complaints from residents residing on McDonald Street concerning flooding of their street. Storm water drains towards Lincoln Road; however, there is neither a ditch nor an easement in which drainage improvements could be installed.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Installation of one pump and outfall structure.

**PROJECT JUSTIFICATION:**

The City has had to depend on the Levee Board to provide pumps to protect the North Third Street Area. In the past, the Levee Board has been very dependable; however, with the deterioration of the control structure and the increase of flooding within the Levee District, I am not sure if we will continue receiving the protection we have come a custom to. For the past several years, we have had at least two flood events in this area per year and we need to plan for our own protection in lieu of depending on the Levee Board coming to our rescue.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Install reinforced concrete pipe and other drainage appurtenances along Empire Drive from the intersection of Baldwin Avenue to Horseshoe Canal.

**PROJECT JUSTIFICATION:**

Storm water flows down Empire Drive to the intersection of Baldwin Avenue from MacArthur Drive then continues down Empire Drive to an open ditch which flows into the Horseshoe Canal. During medium or greater rain fall the intersection of Empire Drive at Baldwin Avenue is flooded. This street is heavily used as a means of travel from Sterkx Road to MacArthur Drive.

<b>TOTAL COST</b>		1,000	6,000	442,000	9,000	458,000

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Installation of 15", 18", 24", 30" and 36" RCP, catch basins, street and driveway pavement removal and replacement, relocation of utilities and all additional drainage appurtenances necessary to complete this Project.

**PROJECT JUSTIFICATION:**

Storm water drains along North Drive from Horseshoe Drive to Culpepper Road during rain events. Due to the length of North Drive and the absence of catch basins for the collection of storm water, North Drive floods during medium rain events. The propose project will provide needed catch basins to collect storm water and flooding along North Drive should be reduce substantially.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Installation of two storm water pumps at Bayou Phillips Flood Gate.

## PROJECT JUSTIFICATION:

The City has completed construction of a \$13,000,000 complex in the Industrial Park. The runoff from our complex and other structures constructed or to be constructed empties into Bayou Phillips and drains into Bayou Rapides then to the Red River. When the river is high and storm water is restricted the flood gate at Bayou Phillips is closed to prevent back water flooding north of Bayou Phillips. Last spring the gates were closed and we had several days of rain. This caused flooding of the complex site and restricted construction for several weeks.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Installation of 24", 48" and 54" RCP within an existing ditch located on Hudson Boulevard from Mobile Street to Natchez Street along with catch basins and all additional drainage appurtenances.

**PROJECT JUSTIFICATION:**

The existing ditch needs to be deepened in order to carry the volume of storm water flowing in this ditch to Hynson Bayou. Presently the area draining towards this ditch floods since the ditch cannot be deepened without causing the adjacent road to fail. In order to protect the existing road and provide some of the needed drainage improvements, the installation of concrete pipe within the existing ditch is the only method of improvement available to address this problem.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**  
 Extend construction of Versailles Boulevard from Fieldcrest Avenue to the Diversion Canal, interconnect with Bluebird Lane and Windermere Boulevard, along with necessary street and drainage appurtenances. Improvements will be Phase 1 of an overall project to interconnect Jackson Street to Coliseum Boulevard. After completion of Phase 1, accessibility will be available to our citizens for travel between Charles Park, Highpoint, Brentwood, Hunters Grove, Clermont, Fairfield, Good Earth and Lebanon Subdivisions to Twin Bridges Road, Jackson Street to Coliseum Boulevard.

**PROJECT JUSTIFICATION:**  
 It is necessary to construct another road that will move traffic away from the construction area of the proposed five lane of Jackson Street. Completion of the extension of Versailles Boulevard will allow subdivisions located between Jackson Street and the Diversion Canal to use this road to Coliseum Boulevard thence to the business district. Partial funding is obtainable through the Urban Systems Program.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Reconstruction of Heyman Lane from Coliseum Boulevard to Castle Road by widening the existing pavement to 30 linear feet; widening the intersections of Coliseum Boulevard and Castle Road to 40 Linear feet for 2 travel lanes and 1 turn lane; 8" thick concrete pavement; subsurface drainage; sidewalks on both sides of street; and, all necessary street and drainage appurtenances.

**PROJECT JUSTIFICATION:**

Portions of Heyman Lane have been recently resurfaced as a temporary means to accommodate the traffic along Heyman Lane; however, due to the condition of the pavement base, additional repairs will have to be made in the near future. The City has an opportunity to obtain partial funding for street improvements through the Urban Systems Program.

Project is shown on the Master Street Plan.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Construct two traffic lanes measuring 12' wide with 10' and 8' shoulders along with necessary street and drainage appurtenances from the relocation of New York Ave. (La. 1208-1) along Sugarhouse Road towards Bayou Hynson approximately 1100 linear feet past Lincoln Road.

## PROJECT JUSTIFICATION:

Drainage improvements are needed to accommodate the required drainage for the relocation of New York Ave. (La. 1208-1) since our existing drainage facilities will be unable to handle the increased design flow from La 1208-1 to Bayou Hynson. The Master Street Plan indicates a proposed street improvement connecting MacArthur Drive To La. Highway 1. By implementing the Master Street Plan we will not only construct a proposed street improvement but also construct drainage improvements which are shown on the Master Drainage Plan.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Installation of 8" concrete pavement with curb, reinforce concrete pipe, catch basins, traffic control devices and all required street and drainage appurtenances at the intersection of Jackson Street and Horseshoe Drive.

**PROJECT JUSTIFICATION:**

Reconstruct the intersection of Jackson Street and Horseshoe Drive due to increase traffic flow. Horseshoe Drive to be widen from two lanes to three lanes, Twin Bridges Road from two lanes to three lanes, Jackson Street from four lanes to five lanes and Lodi Road from two lanes to four lanes.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Replacement of existing creosote piling bridge with a concrete pile bridge and concrete decking.

## PROJECT JUSTIFICATION:

We have received notification from LDOTD that the bridge crossing Chatlin Lake on Broadway Avenue has numerous creosote piles which have deteriorated and has loss it's structure strength; therefore this bridge needs to be replaced soon. We have met with our MPO representative to request the placement of this Project on the TEA-21 Program for Federal Participation. Approval has been obtained and we will now be eligible for up to 80% reimbursement of the Construction Cost associated with this Project.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Reconstruction of Heyman Lane from Castle Road to Jackson Street by widening the existing pavement to 30 and 40 linear feet; widening the intersection of Jackson Street to accommodate 5 lanes; realignment of Heyman Lane at Dorchester Drive; 8" thick concrete pavement; subsurface drainage; sidewalks on both sides of street; and, all necessary street and drainage appurtenances.

## PROJECT JUSTIFICATION:

Portions of Heyman Lane have been recently resurfaced as a temporary means to accommodate the traffic along Heyman Lane; however, due to the condition of the pavement base, additional repairs will have to be made in the near future. The City has an opportunity to obtain partial funding for street improvements through the Urban Systems Program.

Project is shown on the Master Street Plan.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Installation of 8" concrete pavement with curb, reinforce concrete pipe, catch basins, traffic control devices and all required street and drainage appurtenances.

**PROJECT JUSTIFICATION:**

The volume of traffic along Lodi Road has increased due to present Subdivision development. Additional property in this area is now being considered for development, some of which as commercial with the remainder as residential. The anticipated traffic volume to be generated by the proposed developments will require the widening of Lodi Road from a two lane road to at least a four lane improvement.

Project is shown on the Master Street Plan.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Widening of North Mall Drive and Lee Street. North Mall Drive will be widen from a three lane pavement section to a five and six lane pavement section. Lee Street to be widen from a four lane to a five lane section. This project will also provide intersection improvements for Lee at Broadway and North Mall Drive at Sterkx.

**PROJECT JUSTIFICATION:**

With the construction of new retail stores along North Mall Drive and North Boulevard traffic has increased substantially along North Mall Drive. Traffic presently extends through the intersection of North Mall Drive at Sterkx Road awaiting the traffic light to change. Also, traffic is backing up towards the Broadway Interchange from Lee Street. The proposed changes will provide additional lanes to handle the increased traffic as well as making improvements to the traffic lights at Broadway and Lee and North Mall Drive at Sterkx.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Construct five foot wide sidewalk along Enterprise Road.

**PROJECT JUSTIFICATION:**

Enterprise Road has road side has limited shoulders and deep ditches. When children are dropped off from school at Highway 1 at Enterprise Road, the children have to walk on the street since there is little room for them to walk on the road shoulder. Sidewalks will be constructed behind the existing ditch which will provide safety for the children as they walk home from the school bus stop.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Reconstruction of Browns Bend Road from MacArthur Drive to Left Bank Subdivision consisting of the removal of existing asphalt surfacing; installation of at least 6" thick crushed limestone; 3" of asphalt surfacing; connecting existing driveways to new pavement; installing a 3' wide shoulder on both sides of new pavement; and, installation of traffic control devices.

## PROJECT JUSTIFICATION:

There are several new subdivisions that are being constructed adjacent to Browns Bend Road between MacArthur Drive and Left Bank Subdivision. As a result of the new construction and the condition of the existing road pavement, Browns Bend Road is deteriorating and has numerous potholes.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

To acquire land for park and green space for the City of Alexandria. This is a multi-year project that is seeking to secure a large acreage tract.

To improve and develop parks and green space within the City of Alexandria. This is a multi-year project that is seeking to enhance the aesthetic quality and recreational function of existing and future City owned parks and green space.

**PROJECT JUSTIFICATION:**

Park and green space in Alexandria is being overwhelmed by usage. There is not adequate space to accommodate citizen usage. Additional land is necessary.

The City has begun an aggressive land acquisition program to accommodate the increased citizen usage of parks and green space. Additional funds are necessary to develop tracks as they are acquired by the City.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

To renovate some existing facilities, creating natural habitat areas for exhibition of current animal collection. Modifications to Area 1 include removal of round cages replacing with spacious outdoor enclosures using the same nighthouses (primates). Completed projects (funded by FOTAZ) include the old deer pen renovation (Australian Walk About) and Maned Wolf Exhibit.

## PROJECT JUSTIFICATION:

These renovations follow the Alexandria Zoo Master Plan development. This is in keeping with industry standards and recommendations for enhanced animal husbandry and providing enrichment for our captive collection of animals. The public expects to view animals in a naturalistic enclosure. Area 1 is outdated by zoo standards.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

To remodel the City Park swimming pool pump building to serve as a quarantine facility for health care. This would include replacing and adding doors, windows sinks, counters, cages, enclosures, floor drains, and a heat and air conditioning system. Most work will be done in-house.

## PROJECT JUSTIFICATION:

It is required by USDA and AZA accreditation to have separate quarantine facilities for new arrivals and for sick animals. One room in our hospital was originally a quarantine room, but is now occupied all winter by animals requiring indoor winter quarters. This large pool pump house is very sturdy (concrete and brick construction) and is worth remodeling. It is also located next to the animal hospital. Remodeling this building is also more economical than new construction. The Zoo will begin its accreditation process in September 2001.

## PROJECT PRIORITY:

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

According to the Zoo's Master Plan Update, the maintenance facility should be housed in the northwest area of the Zoo between the railroad track and the pool building. A pre fab 30X60 metal building in this area would house a large maintenance shop, office, and restroom.

## PROJECT JUSTIFICATION:

This would centralize maintenance operations and moving the maintenance workshop will allow expansion to the food prep facility.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Renovate some existing facilities, creating natural habitat areas for the exhibition of current animal collection. Modifications to Area 1 include removal of round cages, replacing with spacious outdoor enclosures using the same night houses (primates). Other in-house renovations include replacing wire on several older exhibits built in the late 1970's.

**PROJECT JUSTIFICATION:**

These renovations flow the Alexandria Zoo Master Plan as well as industry standards and recommendations for enhanced animal husbandry. Area 1 and other enclosures needing renovations are outdated by zoo standards. Also, the public expects to view animals in natural habitats. Rust & corrosion of cage wire is not permissible under USDA guidelines. Painting and patching wire are no longer options when considering safety & aesthetics. Replacing wire will lessen the likelihood of compliance violations.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Construct 2000 square foot block building for animal food preparation, employee facility, storage, and office for Inventory Coordinator. Vital to daily operations, it will be located between old swimming pool and Hynson Bayou.

## PROJECT JUSTIFICATION:

The Zoo has outgrown existing food preparation/kitchen area and new location is more central to operations. This area is accessible from Babe Ruth Drive by large delivery trucks and is close to food storage freezers. Employees need area with lockers and showers. This will replace 1000 square foot building built in the 1970's. Existing building has rodent and pest infestation and inadequate plumbing and electrical. Present building has no area for employees.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

In order to maintain proper guest services, retail outlets are important to the Zoo's operation. Need to study the possibility of enlarging the gift shop area and the placement of a new structure. The current administrative offices could then expand into the area of the current gift shop allowing for the restructuring of zoo administrative functions.

**PROJECT JUSTIFICATION:**

The Zoo entrance buildings were built in 1994 and no major renovations have been done since. As the number of activities increase, the congestion becomes a bigger problem. This area needs to be redesigned to improve visitor services, traffic flow, and entry to the Zoo. A study should be done to determine how to accomplish this and still maintain a plaza or green space at the entrance for larger crowds.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

The original master plan for the Zoo was completed in 1988. It was revisited a few years ago with some recommendations by the David L. Manwarren Corp. of California. The plan needs to address land use, particularly at the front entrance of the Zoo, placement of zoo operations such as maintenance, and the biggest problem, parking. It would also address the Zoo's aesthetic appeal along Masonic Drive as a gateway to the City.

## PROJECT JUSTIFICATION:

The plan update is needed to proceed with Zoo development in the most logical manner. There are areas where usage may need to be changed. Zoo attendance during school field trips and special events exceeds existing entry space. This needs to be addressed soon to solve several problems within the Zoo perimeter as well as the critical parking issue.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

The Leopard Exhibit will be located in a portion of the undeveloped area between the old swimming pool and Babe Ruth Drive. The exhibit will house 2 leopards. It will be constructed of stainless steel and woven wire, chainlink, and will have glass viewing areas. It will be approximately 75' X 80'. FOTAZ has hired a zoo designer to develop the conceptual drawings for the exhibit. This construction will be coordinated with the modification of the Lion Exhibit.

## PROJECT JUSTIFICATION:

The leopard exhibit is the next logical step in the development of the African Experience. A \$25,000 donation was given to FOTAZ for the future exhibit. This will allow the Zoo to move forward with the African Experience and bring another popular cat species to the Zoo. This addition will help generate interest for the development of this area.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

To renovate the buildings being vacated by John Eskew Training Center (January, 2004) for use by the Zoo in education. Painting, minor repairs, and updating are needed. Three buildings are on the property; two are brick with concrete foundations. One is a condemned wooden structure that should be torn down ASAP.

**PROJECT JUSTIFICATION:**

Existing education programming is done out of an 800 sq. ft. building constantly in need of maintenance. Over 20,000 children visit the Zoo annually. Existing space will not accommodate a normal school field trip.

<b>TOTAL COST</b>				75,000		75,000

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

In keeping with the theme of the LA Habitat Exhibit, we are developing a plan for a small mammal exhibit at the site of the previous memorial structure. This would be a natural environment built of concrete and artificial materials, with possible under water viewing of the animals. This may include beaver and/or muskrats.

**PROJECT JUSTIFICATION:**

Due to limited space several LA mammals that were originally planned for LA Habitats had to be excluded. This area provides an excellent opportunity to feature more LA animals.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Parking is one of the more serious problems plaguing all operations in the Bringhurst Park area; including the Zoo, Youth Baseball Complex, Bringhurst Golf Course, Bringhurst Ballfield, and Bolton High School during ball games. The City could purchase the Texaco Station and property from the St. Frances Cabrini Dialysis unit to the intersection of Babe Ruth and Masonic Drive. An aesthetically pleasing landscaped parking area and picnic area would be placed there.

## PROJECT JUSTIFICATION:

The neighborhood and the public facilities in the area would greatly benefit from added parking. Events like Zoo Boo, Wild Side of the Arts, and Holiday Light Safari attract thousands of visitors. At present, events are self-limited due to the lack of parking.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

An area roughly 100' X 100' with bronze animal sculptures, a water area that contains a large granite globe suspended in water. Other features include shooting fountains of water for children to play in and an area surrounded by benches. The fountain will hold no less than 2" of water and will be constructed of safe, non-slip materials.

## PROJECT JUSTIFICATION:

This will provide additional recreational opportunities in the community; a place to cool off in the summer. Will include an attractive entrance display. It is low maintenance.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Replace undersized, old conductors on existing 12.5 KV circuits that have become too small to carry the load required and to replace existing 2.5 KV line with 7.2 KV Distribution.

2006-2007 Budget includes preparation for Recycling Services.

## PROJECT JUSTIFICATION:

Continued expansion of the system, along with load growth has made many old circuits inadequate. Voltage regulation, burned connections and customer complaints require upgrades on a continuing schedule as workload and funds allow.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Purchase and install a Gas Turbine and Recovery Boiler for Units 1 & 2.

## PROJECT JUSTIFICATION:

With gas pricing surely to increase in the next decade for generating facilities and the stringent EPA Clean Air Act provision, it would behoove the City to buy a Gas Turbine and Recovery Boiler to interface with existing units 1 & 2. This would allow the plant to increase its megawatt capacity with a substantial savings to its citizens by lowering the cost of fuel adjustment by approximately 36%

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Build parallel 138 KV tie from Twin Bridges Substation to Prescott Road Substation, with two 12.5 KV underbuild lines for developments adjacent to the route proposed. Also includes a fiber optic shield wire from Prescott Substation to Bayou Rapides Substation to insure adequate control of breakers, relaying, and control of system. Radio communications sometimes get impeded by other entities with frequencies too close to the SCADA frequencies.

## PROJECT JUSTIFICATION:

To allow proper circuit switching, improve system reliability, and permit greater flexibility for CLECO to wheel through our transmission system. The current configuration does not allow adequate redundancy in the event of a failure of the line or equipment tied to it. The added underbuild provide greater switching capabilities in the event of a failure of one or more substations.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Install new SCADA control at Electric Distribution Office.

## PROJECT JUSTIFICATION:

Current SCADA System (Landis & Gyr 6700) was installed in 1988 and is now obsolete. New systems are PC driven, with accessory programs to monitor, track, & forecast load flow, trends, connectivity for outage reporting and many new features that are functioning at other utilities nationwide, but cannot be installed on our present system.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Replace approximately 84 transmission poles in the 138 KV Loop. Original poles were installed in the 1960's and had an anticipated life of 30 years. Most of the engineering has been done "in house".

## PROJECT JUSTIFICATION:

The 138 KV Loop provides power to all the substations in the system. If 2 sections of the loop are lost simultaneously, many customers would be without power until the 90' and 100' poles could be replaced, which would take too long with existing City crews and equipment.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Repaint substation transformers and switchgear at Sterkx Road and Willow Glen Substations. Rusted areas will be sand blasted, filled with sealing material, primed and painted with epoxy paint.

## PROJECT JUSTIFICATION:

Original substation equipment is rusting out to the point where they leak during rain, allowing water to get on the internal high voltage components. Several insulators have arced over from rain getting into the switchgear, causing serious damage to the bus bars and arc chutes.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Replace OCB's with GCB's. Build Distribution Station on adjacent land within Power Plant yard. Convert existing substation to switch yard for transmission.

## PROJECT JUSTIFICATION:

Existing substation was built in 1964. The equipment and cables are past useful life. All bulk energy moved through the 138KV system goes through this substation. The stability and reliability of the entire transmission system is compromised as this older equipment fails. Three other capital projects related to the DG Hunter Substation can be combined or eliminated by this project.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

New 138/12470 Substation needed to relieve Prescott Substation and Twin Bridges Substation. New station would have dual 28MVA transformers and 8 potential circuits. Station could start with 1 transformer and be upgraded later as loads demand.

## PROJECT JUSTIFICATION:

Neither Prescott, Twin Bridges, nor Sterkx Road Substations can provide back up power during peak loading and planned maintenance. Neither substation can safely carry the combined load of both during emergencies. Southwest Power Pool 2011 Model justifies an additional substation to prevent possible blackout caused by CLECO 138 KV failure.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Convert all circuits on Prescott 2,400V Substation to 7,200V operation.

## PROJECT JUSTIFICATION:

Existing 2,400V substation and lines have been in service for over 40 years. Since 1987, long range plans have recommended this project. Line loss and reliability will be much improved upon completion. Delaying this project will increase cost by more than 25%. New federal regulations for transformer efficiency take effect in 2010. Transformer prices are expected to rise by more than 40% as these regulations take effect.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Replace underground feeder cables from switchgear to riser poles at the D. G. Hunter Substation. Replace old riser poles and install new terminations and lightning protection on replaced cables.

## PROJECT JUSTIFICATION:

Existing high voltage cables are 350 MCM ( rated for 300 Amps). Cables are over 30 years old (average rated life), and have begun to fail. Numerous high voltage terminations have failed recently because of years of lightning strikes, submersion in water, and aging. New cables will be 1000 MCM (rated for 600 Amps). This will allow us to tie 2 circuits together for maintenance and emergency situations.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Adjust (relocate) existing 2" and 4" gas mains along Sugarhouse Road from West Street to Hynson Bayou and along Lincoln Road from Sugarhouse Rd to Hudson Blvd due to widening of roadways and subsurface drainage improvements. Replace existing 4" with equivalent dual new 3" P.E. mains, including new service assemblies and service lines to residences in the area.

## PROJECT JUSTIFICATION:

Adjust and relocate existing gas mains so that there is no gas utility conflict with reconstruction and widening of Sugarhouse Rd and subsurface drainage improvements on Lincoln Rd. Replace services and service lines to upgrade area to gas distribution standards required.

## PROJECT DESCRIPTION:

Replacement and reconstruction of Martin Park Subdivision, Zone 21 gas distribution system for the area from Horseshoe Drive to Spencer Street and from Manor Drive to Mansour Avenue. This project will include a gas regulator station, 2" through 4" mains and new service lines and assemblies.

## PROJECT JUSTIFICATION:

The existing gas lines in this area are antiquated and leak prone causing a very hazardous situation. This work will upgrade the area's gas system and reduce the probability of hazardous gas problems.

**PROJECT DESCRIPTION:**

Replacement and reconstruction of Zone 19 gas distribution system for the area from Stimson Avenue to Hynson Bayou to Rapides Avenue to MacArthur Drive Service Road back to Stimson Avenue, including new 2" and 3" P. E. gas mains, new service assemblies and lines.

**PROJECT JUSTIFICATION:**

Zone 19 represents a continuation of the Master Plan Gas System Replacement Program, as Work Priority #23. The existing gas lines are antiquated and leak prone. This work will upgrade the area's gas utility system to satisfy U.S. DOT's office of Pipeline Safety standards required.

**PROJECT SPECIFICATIONS**

<b>PROJECT DESCRIPTION:</b> Replacement and reconstruction of Zone 20 gas distribution system for the area from Stimson Avenue to Hynson Bayou to Parkway Drive to Texas Avenue to Jackson Street to Macarthur Drive Service Road back to Stimson Avenue, including new 2" and 3" P. E. gas mains, new service assemblies, and service lines.			
<b>PROJECT JUSTIFICATION:</b> Zone 20 represents a continuation of the Master Plan Gas System Replacement Program, as Work Priority #24. The existing gas lines are antiquated and leak prone. This work will upgrade the area's gas utility system to satisfy U.S. DOT's office of Pipeline Safety standards required.

## PROJECT DESCRIPTION:

Sewer line rehabilitation.

## PROJECT JUSTIFICATION:

Repair, reline or replace deteriorated mains, manholes and services that are identified as causing excess infiltration and inflow into the collection system. This project addresses our entire collection system. Increased cost are to ensure EPA compliance in coming years. We have received correspondence for the EPA urging the reimplementation of this program.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Construction of Major Pumping Station, Force Main, and Gravity Sewer.

## PROJECT JUSTIFICATION:

This project will eliminate 7 smaller lift stations and will also relieve the overloading of Charles Park Lift Station. This is also a vital part of the West Alexandria Wastewater Treatment Plant Study. This will also facilitate the development along Versailles Boulevard when it is extended.

## PROJECT PRIORITY:

A

## START DATE:

2006

## EST TIME TO COMPLETE:

12-18 months

## OPERATING BUDGET EFFECT:

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Construction of alternative disinfection facility at the Wastewater Treatment Plant.

## PROJECT JUSTIFICATION:

Current disinfection is achieved with liquid chlorine stored in 1 ton cylinders at the Treatment Plant. This process is very dangerous and poses major liability for the City. Alternative Disinfection will eliminate this risk. Possible funding is available through the Community Water Treatment Hazards Reduction Act, Senate Bill 2855.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Construction or renovation of existing structure for a new, centralized customer service center.

## PROJECT JUSTIFICATION:

Presently, primary customer contact is at two sites. This new facility will place the functions handled at the Utility Customer Service Office and the Business Office, at one location, providing the public with "one stop shopping" for payment and services regarding utilities, property taxes, occupational licenses, and the like. It will also provide the City with the inherent efficiencies of a single operation.

**PROJECT SPECIFICATIONS**

<b>PROJECT DESCRIPTION:</b> Purchase of a payroll time keeping system for use by virtually all City departments. Purchase of a centralized cash receipting system to handle all major customer receipting handled by the City.			
<b>PROJECT JUSTIFICATION:</b> At present, payroll records are kept at the department level by various means. Payroll hours are then manually entered into the City's computer system by the Accounting Department. A time keeping system would standardize the keeping of the data and enable the departments to enter the data themselves, eliminating the duplication of effort. At present, cash receipts are run through the individual computer systems to which they relate; utilities, property taxes, occupational licenses, etc. A centralized receipting system would streamline the process at the cashier window, providing the City with greater efficiency and our citizenry with faster service.

<b>PROJECT DESCRIPTION:</b> Upgrade existing telephone network to be self reliant. Will allow phone communications between all city facilities to continue without interruption in service from Bell South is lost.			
<b>PROJECT JUSTIFICATION:</b> Eliminate dependence on Bell South and problems with old phone lines that Bell South refuses to replace. Creates redundancy where a single point of failure will not effect telephone network. All sites will be capable of running on their own without being connected to City Hall. No limitations on voice calls between facilities. All facilities would have features that the central switch has. All future upgrades can be done at once instead of at each different facility. Upgrades can be done without shutting down the entire telephone network.
