<b><u>R. FIVE YEAR PLAN</u></b>	

April 30, 2023

Honorable Mayor and  
Members of the Alexandria City Council

I am pleased to present the City of Alexandria's Annual Capital Budget and Five Year Plan for the fiscal years 2023/2024 through 2027/2028. Each capital project includes source(s) of funding; prior, current and future expenditures; and scheduling and expenditure breakdowns. The plan, as presented, balances each year's estimated revenue sources with a current or future project's estimated funding requirements.

The City's Home Rule Charter requires the Mayor to submit to the Alexandria City Council a Capital Improvements Program covering a minimum of 5 years. The plan is required to be submitted at the same time as the annual operating budget for the upcoming fiscal year. An appropriation approved by the Council continues in force until the purpose for which it was created is fulfilled or abandoned. The Charter states that any appropriation shall be deemed abandoned if 3 years pass without any disbursement from or encumbrance of the appropriation.

A Five Year Capital Improvements Program requires long term planning. It also requires a constant monitoring of current trends in order to make necessary adjustments to current and future projects proposed in the plan, particularly in times of uncertainty like the present one. The environment in which the City exists is highly fluid, requiring constant reassessing of the prioritization of projects under contemplation. The Administration and Council of the City of Alexandria remain engaged in this process for the benefit of its citizenry.

Jacques M. Roy  
Mayor

012

David L. Johnson  
Director of Finance  
Post Office Box 71  
Alexandria, LA 71309-0071

## General Capital Projects

The following is a breakdown of the General Capital Projects by Category:

<b>Category</b>	<b>No. of Projects</b>	<b>Total</b>
Public Enterprise	10	6,275,000
Drainage	2	1,875,000
Streets	7	5,300,000
Police	-0-	-0-
Fire	-0-	-0-
Parks	1	400,000
Zoo	-0-	-0-
<b>Total</b>	<b><u>20</u></b>	<b><u>\$ 13,850,000</u></b>

The General Capital Projects are funded by Sales Tax Revenues, Property Tax Revenues, State and Federal Funds and Other Revenues. A five year 11.25 millage property tax dedicated to general capital projects has been approved by the voters in 1988, 1998, 2003, and 2008. This property tax renewed in 2018 for ten years. One-half of the 1976 Sales Tax is dedicated to payment of principal and interest on the sales tax bonds and capital improvements.

Projects involving economic development, construction of new facilities, renovation of existing public facilities and feasibility or master plan studies are budgeted under the Public Enterprise category. The City currently has budgeted 17 projects in this category. The 2023-2024 Budget will add 2 projects and adjust funding for 9 of these projects. A major project added to this category is a \$3 million cost share with Louisiana State University – Alexandria to expand its medical instruction facilities in downtown Alexandria.

Other projects receiving additional funding this year will include Elliott Street Reconstruction Foisy Street Reconstruction, Chatlain Overflow Structure to alleviate flooding and Residential Ditch Closure.

The Reserve for Relocation Project, operates as “holding” account for the other projects. The Reserve for Relocation Projects is used to “hold” Utility Funds transferred to the General Capital Projects fund for use with street or drainage projects. The reconstruction of streets or drainage systems often requires the movement or relocation of utility systems. A minimum appropriation of \$100,000 per year is typically made by the Utility Funds to the General Capital Projects Fund.

Budget Amendments will be used to transfer the Utility Fund into special account numbers within a related project. If Utility Funds remain in a completed project, these funds are transferred back to the Reserve for Relocation Projects “holding” account.

**Enterprise Capital Projects**

The following is a breakdown of the Enterprise Capital Projects by Category:

<b>Category</b>	<b>No. of Projects</b>	<b>Total</b>
Electric	8	2,102,000
Water	7	7,902,000
Gas	10	971,000
Wastewater	3	1,240,000
Other	<u>1</u>	<u>100,000</u>
Total	<u>29</u>	<u>\$ 12,315,000</u>

The Enterprise Capital Projects are funded by revenues generated by the City’s Utilities System, Utility Revenue Bonds, revolving loans from the State Department of Health and Hospitals, and matching FTA grants.

At present, the City is engaging consultants to assess the needs of its Utilities System infrastructure. This will assure the ability of the 4 components; electricity, gas, water and wastewater, to provide reliable service to the customer at the existing level of service as well as provide for any anticipated growth in all areas. This assessment will materially impact future capital budgets in the Enterprise Capital Projects. To this end, the City remains diligent in maintaining the combined infrastructure of the Utility System for the future use of it’s citizens.

The Enterprise Capital Projects are funded by revenues generated by the City’s Utilities System, Utility Revenue Bonds, revolving loans from the State Department of Health and Hospitals, and matching FTA grants.

At present, the City is engaging consultants to assess the needs of its Utilities System infrastructure. Sincerely,

David Johnson  
Director of Finance  
City of Alexandria

**CITY OF ALEXANDRIA  
FIVE YEAR CAPITAL IMPROVEMENT PROGRAM  
GLOSSARY OF TERMS**

**REVENUE TERMS:**

**Community Development Block Grant (CDBG)** - Revenue received from the Community Development Block Grant source via the City's Community Development department.

**Federal Grants** - Revenue received from the U.S. Government, or as a Federal pass-through grant from the State of Louisiana.

**Property Taxes** - Revenue from the 11.25 milage Capital Projects Tax.

**Sales Tax (STX)** - Revenue from the City's Capital Outlay Fund supported by the ½ cent sales tax.

**Sales Tax Bonds (STXB)** - Revenue from sales tax bonds.

**Special Assessments (ASMT)** - Revenue received from the legal process of assessing benefitted property owners or physical improvements such as sewer lines or street improvements.

**State Grants** - Funds received from the State of Louisiana, excluding pass-through grants.

**Utility Revenue Bonds (RB)** - Revenue from the sales of Utility Bonds.

**Expenditure Terms:**

**Construction** - Contracted cost associated with the actual implementation or construction of an improvement. This should include material costs associated with projects utilizing city crews for implementation.

**Demolition Cost** - Contract cost associated with demolition or site preparation.

**Engineering/Architectural Design** - Any cost related to the design phase of the project either by the city or private firm.

**Inspection Fees** - Cost of providing for project inspection usually performed either by the city or private firm.

**Land Acquisition** - Any cost associated with the acquisition of property of implement the project.

**Landscaping** - Costs associated with miscellaneous grading and landscaping activities incidental to the construction activity. Landscaping for parks should be shown in the construction classification.

**Major Equipment** - Costs associated with movable or immovable equipment, generally costing over \$5,0000 and having a useful life of five years.

**CITY OF ALEXANDRIA**  
**FIVE YEAR CAPITAL IMPROVEMENT PROGRAM**  
**GLOSSARY OF TERMS**  
continued

**Miscellaneous Definitions:**

**Activity** - A service performed by a department or division.

**Appropriations** - Authorization granted by the City Council to make expenditures for a given period and the proposed means of financing them.

**Assessments** - An amount levied on personal property on a cost sharing basis for improvements made by the city for the benefit of a small group of property owners (e.g. Special Assessments for the reconstruction of a sewer line in lightly populated area).

**Budget Carryover** - The total of the current budget, April 30, minus prior year(s) expenditures.

**Capital Budget** - The City's five year financial plan that contains both the estimated revenues to be received and the proposed Capital expenditures to be incurred to achieve a stated objective.

**Department** - A section of a Division.

**Division** - A functional unit of the City containing one or more departments or activities.

**Fund** - A fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, together with all related liabilities and residual equities or balances, and changes therein, which are segregated for the purpose of carrying on a specific activities or attaining certain objectives in accordance with special regulation, restrictions, or limitations.

**Fund Balance** - Resources remaining from prior years which are available to be budgeted in the current year.

**Fund Source** - The source of Revenue used to pay for a particular project.

**Ordinance** - A formal legislative enactment by the governing body of a municipality.

**Project** - A large or major undertaking designed to achieve an objective.

**Project Category** - The functional improvement category under which a project is assigned. (e.g., Public Enterprise, Economic Development, Streets, etc.).

**Urban Systems** - Federal funded street projects that match local funds for the reconstruction of major streets.

2023-2024

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

This project is being created in order to facilitate the coordination of appropriations necessary for the relocation of Utilities due to Street and Drainage projects. The Utility Fund will allocate funds to be used for utility relocations associated with Street and Drainage Projects proposed in the 1988 and 1993 Property Taxes. An amendment will be required to transfer the appropriation to the appropriate project.

**PROJECT JUSTIFICATION:**

The establishment of this flow through project allows for better coordination between the Utility Fund and the General Fund on projects associated with the Property Tax projects.

**PROJECT PRIORITY:**

**START DATE:** May, 1993

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Tear out and remodel entire building. Interior renovations would include modernization of HVAC, electrical and plumbing infrastructure, and restructuring interior spaces and finishes. The exterior would include new surface, windows, and roofing. Space needs would be evaluated to assure maximum space utilization.

**PROJECT JUSTIFICATION:**

City Hall was built in 1962. The structure is very sound, due to concrete floors and columns. The exterior envelope has numerous leaks. The vertical window shading is difficult to waterproof. The building's mechanical, electrical, and plumbing systems have exceeded their useful lives and are in need of replacement. This renovation will render the building virtually new and capable of addressing the current and future uses required of it.

**PROJECT PRIORITY:**

**START DATE:** Pending      **EST TIME TO COMPLETE:** 2 Years

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

As our many structures are aging, this project provides for a planned approach to replacement and enhancements of city properties. By including many sub-projects in this single project, this allows for adjustments in priorities of work pending conditions "on the ground" in the current fiscal year. By planning ahead on funding, the Council can anticipate inevitable expenditures while allowing the Building Maintenance operation the flexibility to apply the funds at the most expedient place.

**PROJECT JUSTIFICATION:**

Investments in the mitigation of aging facilities delays large scale replacement and deterioration.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Various efforts toward conservation of energy at City facilities. Current projects include Trail light replacement, parking lot and exterior lighting, and Phase I Replacement of HVAC Controls at the Public Safety Complex.

**PROJECT JUSTIFICATION:**

LED lights are rated at a 12 year cycle, with energy payback in 6 years. The HVAC control project at Public Safety will generate energy savings and better control of the systems.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Enhance the drainage system in Willow Glen Road to prevent flooding during moderate to extensive rainfall events.

**PROJECT JUSTIFICATION:**

The Fairfield and Machine Shop Addition Subdivision is a low lying area along Willow Glen corridor that is protected from flooding by a storm water pump station when flow in the Chatlin Lake Canal does not allow gravity drainage. This project will enhance the infrastructure by increasing the subsurface drainage system and construct an additional pump station to supplement the existing.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Construction of an additional 10' X 10' Reinforced Concrete Box (RCB) Culvert for the Horseshoe Canal at the US 165 (Masonic Drive) crossing.

**PROJECT JUSTIFICATION:**

The additional RCB will alleviate a restricted opening that has created a 2'+ water surface differential at the crossing. This relief will prevent flooding of some of the housing in the Camellia Place and Cherokee Village Subdivisions. This project is eligible for HUD funding through the State of Louisiana.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Construction of an Overflow Relief Structure from Chatlain Lake Canal to the Red River.

**PROJECT JUSTIFICATION:**

During heavy or extended rainfall events, the interior drainage system of the City does not have the capacity to convey the runoff from the rainfall. This lack of capacity results in flooding in several of the low lying areas of South Alexandria resulting in substantial damage. This Overflow Structure will allow the conveyance of runoff from the interior to the Red River. This project is eligible for HUD funding through the State of Louisiana.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

This project will supplement the existing subsurface system currently serving this watershed. The City Engineer's Office submitted an application with the Statewide Flood Control Program for funding these improvements. Improvements to include additional surface collection, subsurface conveyance, additional pumps and power generation for back-up power supply.

**PROJECT JUSTIFICATION:**

This subdivision was constructed in a low-lying area served by the Chatlin Lake Canal. Previous drainage improvements were designed and constructed to accommodate a 25-year design storm. In the past 15 years, there have been four storm events that have caused significant flooding and damage of residential property in this neighborhood. The proposed improvements will safeguard the neighborhood to a 100-year design storm event.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Construct two traffic lanes measuring 12' wide with 10' and 8' shoulders along with necessary street and drainage appurtenances from the relocation of New York Ave. (La. 1208-1) along Sugarhouse Road towards Bayou Hynson approximately 1100 linear feet past Lincoln Road.

**PROJECT JUSTIFICATION:**

Drainage improvements are needed to accommodate the required drainage for the relocation of New York Ave. (La. 1208-1) since our existing drainage facilities will be unable to handle the increased design flow from La 1208-1 to Bayou Hynson. The Master Street Plan indicates a proposed street improvement connecting MacArthur Drive To La. Highway 1. By implementing the Master Street Plan we will not only construct a proposed street improvement but also construct drainage improvements which are shown on the Master Drainage Plan.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Rehabilitation of Elliott Street from MacArthur to the I-49 Underpass. Will include patching existing Portland Cement Concrete Pavement and the patching , milling, and overlay of the Hot Mix Asphaltic Concrete roadways.

**PROJECT JUSTIFICATION:**

Elliott Street is a heavily trafficked roadway connecting MacArthur Drive to the Central Business District. Existing roadway is showing signs of distress. Delaying rehab would result in further damage and increased costs. This street is eligible for matching federal funds under the Surface Transportation Plan.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

This project is MPO funded. It will consist of the design and construction of multiple roundabouts at key intersection on Versailles Boulevard (Bluebird, Ansley and Provine).

**PROJECT JUSTIFICATION:**

Due to the existing and planned growth of the western parts of the city, the average daily traffic on Versailles and its feeder roadways has greatly increased. During peak traffic hours, the intersections of key collector streets are heavily congested resulting in considerable travel delays. Additionally, due to the two-way stops at these intersections and the three-lane configurations for these roadways, the potential for serious accidents is high. Construction of these roundabouts will greatly reduce the travel delays and potential for serious traffic accidents.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Replacement and improvement of overhead baffle system. This baffle is engineered to prevent any live rounds from exiting the range compound. It consists of a series of laminated steel overhead baffles - supported by upright poles. This system is used by the Dallas Police Department to prevent the accidental escape of live fired rounds.

**PROJECT JUSTIFICATION:**

There are people and property in the line of fire down range. This safety system is needed to prevent loss of life, injury, and property damage.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**  
The renovation and reconstruction of the damaged infrastructure at the Johnny Downs Sports Complex

**PROJECT JUSTIFICATION:**  
Western Alexandria was hit by a tornado on December 16, 2019, causing great damage to the Johnny Downs facility. Press boxes, fencing, light fixtures, and other assets were either completely destroyed or severely damaged. This project will bring this heavily used facility back to the purpose for which it was intended by the voters of Alexandria in the 1998 Property Tax Election Call.

**PROJECT SPECIFICATIONS**

<b>PROJECT DESCRIPTION:</b> Will add extensive CCTV and Zoned Audio public address and automated messaging systems. This includes an IP camera system and NVR servers. The audio section includes IP distribution and SIP interface from zoned messaging, paging and kiosk interfaces for centralized management.			
<b>PROJECT JUSTIFICATION:</b> The CCTV system is primarily a risk management tool to limit liability for slip and falls and other incidents. It is also a security tool for point of sales operations and other vandalism and theft. This system will replace and expand upon the system destroyed by Hurricane Gustav. This opening in exposure has raised theft and vandalism considerably. The ability to communicate with the public is critical for reasons such as approaching weather, security incidents, lockdown instructions, and lost children. The zoned system will provide the capability for localized announcements. A SIP interface to phone systems will tie in with City emergency communications.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

15 year Master Plan and Strategic Plan for the Alexandria Zoo, coordinating and addressing all aspects of expected growth and sustainability during the designated timeframe. The Plan should include benchmarks and measurable outcomes to guide the Zoo in attaining its goals and sustaining success. The 4 major sub-components include: (1) Strategic Initiatives that improve visitor experience and insure long term financial ability, (2) Business Plan providing a projection of business goals and feasibilities, anticipated operational and capital expenditures and anticipated revenue requirements, (3) Capital Facilities Concept Plan (working in conjunction with the Business Plan); (4) Current Facilities and Infrastructure Inventory and Maintenance Sustainability Plan, similar to building information models (BIM). This will provide a plan for sustained maintenance.

**PROJECT JUSTIFICATION:**

This will guide and provide the technical framework for either sustaining the current level of service or a financially feasible path toward growth.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Replace undersized, old conductors on existing 12.5 KV circuits that have become too small to carry the load required and to replace existing 2.5 KV line with 7.2 KV Distribution.

**PROJECT JUSTIFICATION:**

Continued expansion of the system, along with load growth has made many old circuits inadequate. Voltage regulation, burned connections and customer complaints require upgrades on a continuing schedule as workload and funds allow.

**PROJECT PRIORITY:**

B

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Replace approximately 84 transmission poles in the 138 KV Loop. Original poles were installed in the 1960's and had an anticipated life of 30 years. Most of the engineering has been done "in house".

**PROJECT JUSTIFICATION:**

The 138 KV Loop provides power to all the substations in the system. If 2 sections of the loop are lost simultaneously, many customers would be without power until the 90' and 100' poles could be replaced, which would take too long with existing City crews and equipment.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Replace existing pilot communications system with ADSS Fiber Optic Cable.

**PROJECT JUSTIFICATION:**

Existing pilot wire system does not correctly control the transfer trip scheme between substations. In some instances, cascading 138KV outages have resulted from this poor communication. This problem must be corrected on the the City will face fines from NERC for failing to correct a know misoperation.

Excess capacity will be made available for use by other City departments.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Sewer line rehabilitation.

**PROJECT JUSTIFICATION:**

Repair, reline or replace deteriorated mains, manholes and services that are identified as causing excess infiltration and inflow into the collection system. This project addresses our entire collection system. Increased cost are to ensure EPA compliance in coming years. We have received correspondence for the EPA urging the reimplementation of this program.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**  
Rehabilitation and replacement of existing downtown sewer mains.

**PROJECT JUSTIFICATION:**  
Existing lines were constructed in the late 1800's and early 1900's. Along with being aged, some mains are undersized for the current capacity they carry.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**  
Upgrade existing telephone network to be self reliant. Will allow phone communications between all city facilities to continue without interruption in service from Bell South is lost.

**PROJECT JUSTIFICATION:**  
Eliminate dependence on Bell South and problems with old phone lines that Bell South refuses to replace. Creates redundancy where a single point of failure will not effect telephone network. All sites will be capable of running on their own without being connected to City Hall. No limitations on voice calls between facilities. All facilities would have features that the central switch has. All future upgrades can be done at once instead of at each different facility. Upgrades can be done without shutting down the telephone network.
