

GOVERNMENT FINANCE OFFICERS ASSOCIATION

*Distinguished  
Budget Presentation  
Award*

**PRESENTED TO  
City of Alexandria,  
Louisiana**

**For the Fiscal Year Beginning  
May 1, 2008**

  
President

  
Executive Director

The Government Finance Officers Association of the United States and Canada (GFOA) presented an Award of Distinguished Presentation to the City of Alexandria for its annual Budget for the fiscal year beginning May 1, 2007.

In order to receive this award, a government unit must publish a budget document that meets the program criteria as a policy document, as an operations guide, as a financial plan, and as a communication device.

The award is valid for a period of one year only. We believe our current budget continues to conform to program requirements, and we are submitting it to the GFOA to determine its eligibility for another award.

<b><u>R. FIVE YEAR PLAN</u></b>	

April 14, 2009

Honorable Mayor and  
Members of the Alexandria City Council

I am pleased to present the City of Alexandria's Annual Capital Budget and Five Year Plan for the fiscal year 2009/2010 through 2013/2014. Each capital project includes source(s) of funding; prior, current and future expenditures; and scheduling and expenditure breakdowns. The plan, as presented, balances each year's revenue sources with a current or future project's funding requirements.

The City's Charter requires the Mayor to submit to the Alexandria City Council a Capital Improvements Program covering a period of at least five years. The plan is required to be submitted at the same time the annual operation budget for the ensuring fiscal year is submitted. An appropriation approved by the council continues in force until the purpose for which it was created has been accomplished or abandoned. The Charter states that any appropriation shall be deemed abandoned if three years pass without any disbursement from or encumbrance of the appropriation.

A Five Year Capital Improvements Program requires long term planning. It also requires a constant monitoring of current trends in order to make any necessary adjustments to current and future projects proposed in the plan. Technological changes and advancements, community needs and changes in revenue sources are often the reason the City will adjust or reassess the Capital Improvements Program. The Administration and the Council have worked closely to improve the long range planning of the future of Alexandria by focusing on the community's needs and goals. They have worked diligently to establish priorities that will meet the changing needs of our community. This budget document has been designed to aid in the planning process, to provide the citizens with a better understanding of the scope and need for various projects, and to provide direction for the City of Alexandria.

### Overview

The 2009-2010 Capital Improvements Program consists of 62 projects totaling over \$20 million. The Administration and Council are continuing their ongoing commitment to improving the City's infrastructure and quality of life for the citizens of Alexandria.

Jacques M. Roy  
Mayor

## General Capital Projects

The following is a breakdown of the General Capital Projects by Category:

<b>Category</b>	<b>No. of Projects</b>	<b>Total</b>
Public Enterprise	11	\$2,216,304
Drainage	11	3,605,000
Streets	13	7,029,000
Police	2	237,200
Fire	0	-0-
Parks/Recreation	0	-0-
Zoological Parks	5	1,714,000
CDBG	<u>0</u>	<u>-0-</u>
Total	<u>42</u>	<u>\$14,801,504</u>

The General Capital Projects are funded by Sales Tax Revenues, Sales Tax Revenue Bond Proceeds, Community Development Block Grant Funds, General Obligation Bond Proceeds, Urban System Funds, State and Federal Funds and Property Tax Revenues. A five year 11.25 mileage property tax dedicated to specific street and drainage projects has been approved by the voters in 1988, 1993, 1998, and 2003. This property tax renewed in 2008 for ten years. One-half of the 1976 City Sales and Use tax is dedicated to payment of principal and interest on the sales tax bonds and capital improvements.

Projects involving economic development, construction of new facilities, renovation of existing public facilities and feasibility or master plan studies are budgeted under the Public Enterprise category. The City currently has budgeted 31 projects in this category. The 2009/2010 budget will create 2 new projects and provide additional funding for 9 others.

Work continues on the Extension of Versailles Boulevard which will ultimately connect Jackson Street Extension with Louisiana Highway 28 West. This 3 phase project will greatly enhance surface transportation in the growing west side of Alexandria. Work also continues on the Ditch Closure Project. This project involves the replacement of open ditches with below grade drainage pipe, giving a safer and more attractive border to the street while enhancing the drainage capacity to prevent flooding.

The Reserve for Relocation Projects, which operate as "holding" account for the other projects. Expenditures from these accounts require Council action. The Reserve for Relocation Projects is used to "hold" Utility Funds transferred to the General Capital Projects fund for use with street or drainage projects. The reconstruction of streets or drainage systems often requires the movement or relocation of utility systems. A minimum appropriation of \$100,000 per year is made by the Utility Funds to the General Capital Projects Fund. Budget Amendments will be used to transfer the Utility Fund into special account numbers within a related project. If Utility Funds remain in a completed project, these funds are transferred back to the Reserve for Relocation Projects "holding" account.

The City's Administration and the City Council reassessed the entire capital improvements budget in Fiscal 2006-2007. The new concept is called Fast Track. It was observed that more projects were being placed in the budget than could be practically funded, given the City's limited resources. This was particularly true in the Drainage and Streets sections of the budget. Priorities were set and the total number of projects not yet underway was limited to 40. This greatly reduced the number of projects listed and allows the City to sharpen its focus and commit its financial and other resources to attainable results that will have greater impact to the citizenry, along with great economic impact. Some of the major projects include the extension of Versailles Boulevard, reconstruction of Sugarhouse Road, and 6<sup>th</sup> and 7<sup>th</sup> Street connection from Cotton Street to Monroe Street. These will greatly improve transportation in 3 different areas of the City, and should stimulate economic development. As projects are completed, they will be replaced with new ones as funds become available.

### Enterprise Capital Projects

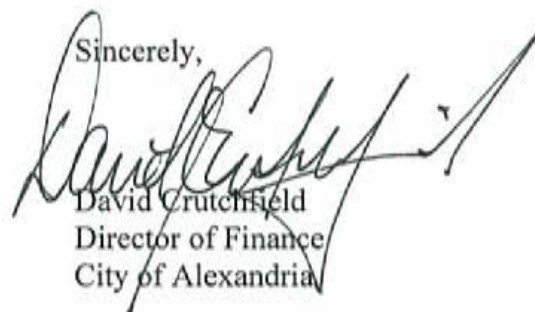

The following is a breakdown of the Enterprise Capital Projects by Category:

<b>Category</b>	<b>No. of Projects</b>	<b>Total</b>
Electric	10	\$1,826,000
Water	4	2,187,240
Gas	0	-0-
Wastewater	3	983,000
Other	3	760,000
Municipal Transit	0	-0-
Total	<u>20</u>	<u>\$5,756,240</u>

The Enterprise Capital Projects are funded by revenues generated by the City's Utility System, a Utility Revenue Bond issue, and matching FTA grants.

At present, the City is engaging consultants to assess the needs of its Utilities System infrastructure. This will assure the ability of the 4 components; electricity, gas, water and wastewater, to provide reliable service to the customer at the existing level of service as well as provide for any anticipated growth in all areas. This assessment will materially impact future capital budgets in the Enterprise Capital Projects.

Sincerely,

David Crutchfield  
Director of Finance  
City of Alexandria

**City of Alexandria  
Five Year Capital Improvement Program  
Glossary of Terms**

**Revenue Terms:**

**Community Development Block Grant (CDBG)** - Revenue received from the Community Development Block Grant source via the City's Community Development department.

**Federal Grants** - Revenue received from the U.S. Government, or as a Federal pass-through grant from the State of Louisiana.

**Property Taxes** - Revenue from the 11.25 millage 1993 Streets and Drainage Tax.

**Sales Tax (STX)** - Revenue from the City's Capital Outlay Fund supported by the 1/2 cent sales tax.

**Sales Tax Bonds (STXB)** - Revenue from sales tax bonds.

**Special Assessments (ASMT)** - Revenue received from the legal process of assessing benefitted property owners or physical improvements such as sewer lines or street improvements such as sewer lines or street improvements.

**State Grants** - Funds received from the State of Louisiana, excluding pass-through grants.

**Utility Revenue Bonds (RB)** - Revenue from the sale of Utility Bonds.

**Expenditure Terms:**

**Construction** - Contracted cost associated with the actual implementation or construction of an improvement. This should include material costs associated with projects utilizing city crews for implementation.

**Demolition Cost** - Contract cost associated with demolition or site preparation.

**Engineering/Architectural Design** - Any cost related to the design phase of the project either by the city or private firm.

**Inspection Fees** - Costs of providing for project inspection usually performed by the design engineer.

**Land Acquisition** - Any cost associated with the acquisition of property to implement the project. It includes, but is not limited to, condemnations, right-of-ways, legal costs, etc.

**Landscaping** - Costs associated with miscellaneous grading and landscaping activities incidental to the construction activity. Landscaping for parks should be shown in the construction classification.

**Major Equipment** - Costs associated with movable or immovable equipment, generally costing over \$5,000 and having a useful life of five years.

**City of Alexandria  
Five Year Capital Improvement Program  
Glossary of Terms**

**continued**

**Miscellaneous Definitions:**

**Activity** - A service performed by a department or division.

**Appropriations** - Authorization granted by the City Council to make expenditures for a given period and the proposed means of financing them.

**Assessments** - An amount levied on personal property on a cost sharing basis for improvements made by the city for the benefit of a small group of property owners (e.g. Special Assessments for the reconstruction of a sewer line in a lightly populated area).

**Budget Carryover** - The total of the current budget, April 30, minus prior year(s) expenditures.

**Capital Budget** - The City's five year financial plan that contains both the estimated revenues to be received and the proposed Capital expenditures to be incurred to achieve a stated objective.

**Department** - A section of a Division.

**Division** - A functional unit of the City containing one or more departments or activities.

**Fund** - A fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, together with all related liabilities and residual equities or balances, and changes therein, which are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions, or limitations.

**Fund Balance** - Resources remaining from prior years which are available to be budgeted in the current year.

**Fund Source** - The source of Revenue used to pay for a particular project.

**Ordinance** - A formal legislative enactment by the governing body of a municipality.

**Project** - A large or major undertaking designed to achieve an objective.

**Project Category** - The functional improvement category under which a project is assigned, (e.g., Public Enterprise, Economic Development, Streets, etc.).

**Urban Systems** - Federal funded street projects that match local funds for the reconstruction of major streets.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

This project is being created in order to facilitate the coordination of appropriations necessary for the relocation of Utilities due to Street and Drainage projects. The Utility Fund will allocate funds to be used for utility relocations associated with Street and Drainage Projects proposed in the 1988 and 1993 Property Taxes. An amendment will be required to transfer the appropriation to the appropriate project.

**PROJECT JUSTIFICATION:**

The establishment of this flow through project allows for better coordination between the Utility Fund and the General Fund on projects associated with the Property Tax projects.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Construction or renovation of existing structure for a new, centralized customer service center.

## PROJECT JUSTIFICATION:

Presently, primary customer contact is at two sites. This new facility will place the functions handled at the Utility Customer Service Office and the Business Office, at one location, providing the public with "one stop shopping" for payment and services regarding utilities, property taxes, occupational licenses, and the like. It will also provide the City with the inherent efficiencies of a single operation.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

1. To provide for a covered drive through unloading animals and adequate quarantine areas
2. To provide a building for both the old and the new cremators
3. To provide for a new cremator.

**PROJECT JUSTIFICATION:**

An enclosed building is needed to perform the task of disposing of euthanized or discarded animals, both for the City and surrounding areas. Currently, animals are unloaded in the weather and in full view of the public. Disposal of animals is unpleasant but necessary, and comes with many criticisms and public relation concerns. The new building will provide seclusion and weather protection while loading and unloading impounded animals, some of whom are vicious and pose a threat during the process. The additional cremator will allow extra volume and be a backup to the existing unit in case of failure.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Phase 1. Replacement of Track door system that splits Convention Hall for Rentals, potable boiler  
Phase 2. Electrical Renovations to Architectural Lighting, dimming systems and Technology upgrades  
Phase 3. Wall resurfacing to create a more acoustically and aesthetically pleasing facility.  
Phase 4. Upgrade existint to meet current NFPA Fire standards.

**PROJECT JUSTIFICATION:**

This venue is in dire need of upgrading. It has stood the test for 45 years but now has become very dingy and in need of updating  
Parts are no longer available for the dimming system and the acoustics are very distracting and unacceptable for a "party"/"conv"  
venue. Technology changes and pressures make the venue not competitive without enhancements.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

As our many structures are aging, this project provides for a planned approach to replacement and enhancements of city properties. By including many sub-projects in this single project, this allows for adjustments in priorities of work pending conditions "on the ground" in the current fiscal year. By planning ahead on funding, the Council can anticipate inevitable expenditures while allowing the Building Maintenance operation the flexibility to apply the funds at the most expedient place.

## PROJECT JUSTIFICATION:

Currently tasks in this project include HVAC Renovation at City Hall, Paint Shop addition, Foundation Repair./ door work at City Compound, Replacement of HVAC Split systems at City Compound and other projects.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Extend the Fueling Depot Canopy to cover all pumps.  
Retrofit/replace obsolete Petrovend POS systems.

**PROJECT JUSTIFICATION:**

The City is required to operate the City Complex under a LDEQ stormwater discharging permit. The permit specifically regulates the discharge from fueling operations and places numerical limits on pollutants that can be discharged such as oil and grease. Initial testing showed the Fuel Depot to be out of compliance. A cover must be constructed over the fueling area to minimize the discharge of petroleum products to the storm drain system.

**PROJECT DESCRIPTION:**

ID Prox Card access systems for gates & turnstiles  
 CCTV System Improvements  
 New vehicle gate operators and renovations

**PROJECT JUSTIFICATION:**

The City Compound houses most of the critical operations of the Public Works Division and some operations of the Utilities Division. There is a considerable investment in equipment and supplies that needs further securing. Existing CCTV system is outdated, inadequate, and is down for repair frequently. Existing gate operators are 15 years old, and should be upgraded with the proposed 24/7 automatic operation. The Card Access System will integrate with the city wide keyless security system to provide tighter control and reporting of access.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Work Management Software will provide cost accounting for labor and materials, preventive work planning and roll up costing on an enterprise basis. The roll out will be in three phases starting with the Water and Building Services Departments. The second and third years will bring on other departments.

**PROJECT JUSTIFICATION:**

Work Orders—scheduling jobs, assigning personnel, reserving materials, and recording costs. Preventive Maintenance—keeping track of preventive maintenance inspections and jobs, including step-by-step instructions or checklists, lists of materials required, and other pertinent details. Asset Management—recording data about equipment and property including specifications, warranty information, service contracts, spare parts, purchase date, and expected lifetime. Inventory Control—management of spare parts, tools, and other materials including the reservation of materials. Advanced Reporting and Analytics—creating customized reports and analyses that can be used to forecast likely problems in time.

**PROJECT DESCRIPTION:**

As this valued and essential asset is aging, this project provides for a planned approach to replacement and enhancements of the Riverfront property. By including many sub-projects in this single project, this allows for adjustments in priorities of work pending condition. This will be a consolidation of some existing projects and addition of some new projects.

**PROJECT JUSTIFICATION:**

Currently, tasks in this project include HVAC Control System upgrade (70K), sealing of exterior masonry(15K), modernization of temporary wiring for conventions(35k), conditioning of equipment storage room to prevent rusting of equipment and furniture (15K), furniture and fixture replacement (85K), upgrade of building lighting system(110K), and other projects.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Reconstruction of concrete slope pavement located at 16th Street Flood Gate Out Fall Structure.

**PROJECT JUSTIFICATION:**

During the construction of Flood Control improvements at the 16th Street Flood Control Structure we noticed failures to the existing slope pavement. Prior to the completion of this project several concrete panels failed due to tremendous voids under the pavement. The concrete pavement needs to be replaced soon to prevent erosion in this area and possible liability to the City in the event someone falls on the pavement.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Installation of 15", 18", 24" and 36" RC pipe; catch basins; reshaping existing ditch; reconstructing McDonald Street with 6" concrete pavement 24 feet wide, relocating existing utilities, and installing all additional appurtenances required to construct this project.

## PROJECT JUSTIFICATION:

City has received complaints from residents residing on McDonald Street concerning flooding of their street. Storm water drains towards Lincoln Road; however, there is neither a ditch nor an easement in which drainage improvements could be installed.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Construction of an earthen ditch from Enterprise Road to Martha Lane., Installation of box culverts across Bolton Avenue (La 1), catch basins, 15", 18" 24" and 30" RCP under driveways and streets to convey storm water to Martha Lane from Enterprise Road and all additional appurtenances to complete this project.

## PROJECT JUSTIFICATION:

Shown on the Master Drainage Map. In addition, this project should reduce flooding in the Wooddale Housing Project as well as provide the City with an improved infrastructure for future development along Bolton Avenue.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Installation of two storm water pumps at Bayou Phillips Flood Gate.

**PROJECT JUSTIFICATION:**

The City has completed construction of a \$13,000,000 complex in the Industrial Park. The runoff from our complex and other structures constructed or to be constructed empties into Bayou Phillips and drains into Bayou Rapides then to the Red River. When the river is high and storm water is restricted the flood gate at Bayou Phillips is closed to prevent back water flooding north of Bayou Phillips. Last spring the gates were closed and we had several days of rain. This caused flooding of the complex site and restricted construction for several weeks.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Installation of 24", 48" and 54" RCP within an existing ditch located on Hudson Boulevard from Mobile Street to Natchez Street along with catch basins and all additional drainage appurtenances.

**PROJECT JUSTIFICATION:**

The existing ditch needs to be deepened in order to carry the volume of storm water flowing in this ditch to Hynson Bayou. Presently the area draining towards this ditch floods since the ditch cannot be deepened without causing the adjacent road to fail. In order to protect the existing road and provide some of the needed drainage improvements, the installation of concrete pipe within the existing ditch is the only method of improvement available to address this problem.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Extend construction of Versailles Boulevard from Fieldcrest Avenue to the Diversion Canal, interconnect with Bluebird Lane and Windermere Boulevard, along with necessary street and drainage appurtenances. Improvements will be Phase I of an overall project to interconnect Jackson Street to Coliseum Boulevard. After completion of Phase I, accessibility will be available to our citizens for travel between Charles Park, Highpoint, Brentwood, Hunters Grove, Clermont, Fairfield, Good Earth and Lebanon Subdivisions to Twin Bridges Road, Jackson Street to Coliseum Boulevard.

**PROJECT JUSTIFICATION:**

It is necessary to construct another road that will move traffic away from the construction area of the proposed five lane of Jackson Street. Completion of the extension of Versailles Boulevard will allow subdivisions located between Jackson Street and the Diversion Canal to use this road to Coliseum Boulevard thence to the business district. Partial funding is obtainable through the Urban Systems Program.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Construct two traffic lanes measuring 12' wide with 10' and 8' shoulders along with necessary street and drainage appurtenances from the relocation of New York Ave. (La. 1208-1) along Sugarhouse Road towards Bayou Hynson approximately 1100 linear feet past Lincoln Road.

## PROJECT JUSTIFICATION:

Drainage improvements are needed to accommodate the required drainage for the relocation of New York Ave. (La. 1208-1) since our existing drainage facilities will be unable to handle the increased design flow from La 1208-1 to Bayou Hynson. The Master Street Plan indicates a proposed street improvement connecting MacArthur Drive To La. Highway 1. By implementing the Master Street Plan we will not only construct a proposed street improvement but also construct drainage improvements which are shown on the Master Drainage Plan.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Reconstruction of Heyman Lane from Castle Road to Jackson Street by widening the existing pavement to 30 and 40 linear feet; widening the intersection of Jackson Street to accommodate 5 lanes; realignment of Heyman Lane at Dorchester Drive; 8" thick concrete pavement; subsurface drainage; sidewalks on both sides of street; and, all necessary street and drainage appurtenances.

**PROJECT JUSTIFICATION:**

Portions of Heyman Lane have been recently resurfaced as a temporary means to accommodate the traffic along Heyman Lane; however, due to the condition of the pavement base, additional repairs will have to be made in the near future. The City has an opportunity to obtain partial funding for street improvements through the Urban Systems Program.

Project is shown on the Master Street Plan.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Installation of 8" concrete pavement with curb, reinforce concrete pipe, catch basins, traffic control devices and all required street and drainage appurtenances.

## PROJECT JUSTIFICATION:

The volume of traffic along Lodi Road has increased due to present Subdivision development. Additional property in this area is now being considered for development, some of which as commercial with the remainder as residential. The anticipated traffic volume to be generated by the proposed developments will require the widening of Lodi Road from a two lane road to at least a four lane improvement. Project is shown on the Master Street Plan.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Construction of a 30 feet minimum 8" thick concrete pavement; concrete sidewalks; sub surface drainage; intersection improvements at Grove Lane and Horseshoe Drive and widening Horseshoe at MacArthur from a two lane to a three lane pavement section.

**PROJECT JUSTIFICATION:**

Horseshoe Drive handles a large volume of traffic that flows from Masonic Drive, Martin Park and several subdivisions along Horseshoe to MacArthur Drive. This project will improve the flow of traffic and correct a bad intersection at Horseshoe and Grove Lane.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Widening of North Mall Drive and Lee Street. North Mall Drive will be widen from a three lane pavement section to a five and six lane pavement section. Lee Street to be widen from a four lane to a five lane section. This project will also provide intersection improvements for Lee at Broadway and North Mall Drive at Sterkx.

## PROJECT JUSTIFICATION:

With the construction of new retail stores along North Mall Drive and North Boulevard traffic has increased substantially along North Mall Drive. Traffic presently extends through the intersection of North Mall Drive at Sterkx Road awaiting the traffic light to change. Also, traffic is backing up towards the Broadway Interchange from Lee Street. The proposed changes will provide additional lanes to handle the increased traffic as well as making improvements to the traffic lights at Broadway and Lee and North Mall Drive at Sterkx.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Construct five foot wide sidewalk along Enterprise Road.

## PROJECT JUSTIFICATION:

Enterprise Road has road side has limited shoulders and deep ditches. When children are dropped off from school at Highway 1 at Enterprise Road, the children have to walk on the street since there is little room for them to walk on the road shoulder. Sidewalks will be constructed behind the existing ditch which will provide safety for the children as they walk home from the school bus stop.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

To acquire land for park and green space for the City of Alexandria. This is a multi-year project that is seeking to secure a large acreage tract.

To improve and develop parks and green space within the City of Alexandria. This is a multi-year project that is seeking to enhance the aesthetic quality and recreational function of existing and future City owned parks and green space.

**PROJECT JUSTIFICATION:**

Park and green space in Alexandria is being overwhelmed by usage. There is not adequate space to accommodate citizen usage. Additional land is necessary.

The City has begun an aggressive land acquisition program to accommodate the increased citizen usage of parks and green space. Additional funds are necessary to develop tracks as they are acquired by the City.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

To renovate some existing facilities, creating natural habitat areas for exhibition of current animal collection. Modifications to Area 1 include removal of round cages replacing with spacious outdoor enclosures using the same nighthouses (primates). Completed projects (funded by FOTAZ) include the old deer pen renovation (Australian Walk About) and Maned Wolf Exhibit.

**PROJECT JUSTIFICATION:**

These renovations follow the Alexandria Zoo Master Plan development. This is in keeping with industry standards and recommendations for enhanced animal husbandry and providing enrichment for our captive collection of animals. The public expects to view animals in a naturalistic enclosure. Area 1 is outdated by zoo standards.

**PROJECT PRIORITY:** A

**START DATE:** On Going

**EST TIME TO COMPLETE:**

As Needed

**PROJECT SPECIFICATIONS**
**PROJECT DESCRIPTION:**

According to the Zoo's Master Plan Update, the maintenance facility should be housed in the northwest area of the Zoo between the railroad track and the pool building. A pre fab 30X60 metal building in this area would house a large maintenance shop, office, and restroom.

**PROJECT JUSTIFICATION:**

This would centralize maintenance operations and moving the maintenance workshop will allow expansion to the food prep facility.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Renovate some existing facilities, creating natural habitat areas for the exhibition of current animal collection. Modifications to Area 1 include removal of round cages, replacing with spacious outdoor enclosures using the same night houses (primates). Other in-house renovations include replacing wire on several older exhibits built in the late 1970's.

**PROJECT JUSTIFICATION:**

These renovations flow the Alexandria Zoo Master Plan as well as industry standards and recommendations for enhanced animal husbandry. Area 1 and other enclosures needing renovations are outdated by zoo standards. Also, the public expects to view animals in natural habitats. Rust & corrosion of cage wire is not permissible under USDA guidelines. Painting and patching wire are no longer options when considering safety & aesthetics. Replacing wire will lessen the likelihood of compliance violations.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Construct 2000 square foot block building for animal food preparation, employee facility, storage, and office for Inventory Coordinator. Vital to daily operations, it will be located between old swimming pool and Hynson Bayou.

**PROJECT JUSTIFICATION:**

The Zoo has outgrown existing food preparation/kitchen area and new location is more central to operations. This area is accessible from Babe Ruth Drive by large delivery trucks and is close to food storage freezers. Employees need area with lockers and showers. This will replace 1000 square foot building built in the 1970's. Existing building has rodent and pest infestation and inadequate plumbing and electrical. Present building has no area for employees.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

In order to maintain proper guest services, retail outlets are important to the Zoo's operation. Need to study the possibility of enlarging the gift shop area and the placement of a new structure. The current administrative offices could then expand into the area of the current gift shop allowing for the restructuring of zoo administrative functions.

**PROJECT JUSTIFICATION:**

The Zoo entrance buildings were built in 1994 and no major renovations have been done since. As the number of activities increase, the congestion becomes a bigger problem. This area needs to be redesigned to improve visitor services, traffic flow, and entry to the Zoo. A study should be done to determine how to accomplish this and still maintain a plaza or green space at the entrance for larger crowds.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

The original master plan for the Zoo was completed in 1988. It was revisited a few years ago with some recommendations by the David L. Manwarren Corp. of California. The plan needs to address land use, particularly at the front entrance of the Zoo, placement of zoo operations such as maintenance, and the biggest problem, parking. It would also address the Zoo's aesthetic appeal along Masonic Drive as a gateway to the City.

**PROJECT JUSTIFICATION:**

The plan update is needed to proceed with Zoo development in the most logical manner. There are areas where usage may need to be changed. Zoo attendance during school field trips and special events exceeds existing entry space. This needs to be addressed soon to solve several problems within the Zoo perimeter as well as the critical parking issue.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

The Leopard Exhibit will be located in a portion of the undeveloped area between the old swimming pool and Babe Ruth Drive. The exhibit will house 2 leopards. It will be constructed of stainless steel and woven wire, chainlink, and will have glass viewing areas. It will be approximately 75' X 80'. FOTAZ has hired a zoo designer to develop the conceptual drawings for the exhibit. This construction will be coordinated with the modification of the Lion Exhibit.

## PROJECT JUSTIFICATION:

The leopard exhibit is the next logical step in the development of the African Experience. A \$25,000 donation was given to FOTAZ for the future exhibit. This will allow the Zoo to move forward with the African Experience and bring another popular cat species to the Zoo. This addition will help generate interest for the development of this area.

<b>TOTAL COST</b>					<b>50,000</b>	<b>50,000</b>

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Complete the relocation of electrical lines services the Zoo underground.

**PROJECT JUSTIFICATION:**

Overhead wires are unsightly in a park setting, unsafe in many situations, interfere with construction projects, and are subject to being pulled down by falling limbs. Relocating the lines underground would prevent the sometimes unattractive trimming of the live oaks and other trees around the Zoo.

<b>PROJECT DESCRIPTION:</b> Placement of generators throughout the Zoo including the Kitchen, Animal Hospital, Education Building, Administration Building, and Louisiana Habitats.			
<b>PROJECT JUSTIFICATION:</b> These generators would assure operations of critical facilities in the Zoo during ice and hurricane events. Due to the dense tree population, ice and wind storms prove to be catastrophic. During such emergency incidents the zoo staff is housed at the zoo and an the emergency action plans require operations. Loss of food inventory and animals will be sustained without this equipment.

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Upgrade the Zoo's technology components including replacement of the CCTV system which was damaged beyond repair during Hurricane Gustav, enhanced lighting for CCTV zones, Central and Zoned paging, Keyless entry prox card system for selected and sensitive zones, and various misc Technology upgrades.

## PROJECT JUSTIFICATION:

Security is a major problem at the zoo. The centralized CCTV system will provide for centralized monitoring of sensitive areas as well as possible animal monitoring in specialized care situations. CCTV is a very helpful tool in risk management related to trip and fall claims. The zoned PA and other communication enhancements will enhance the visitor experience as well as provide technological relief for an overworked staff.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Replace undersized, old conductors on existing 12.5 KV circuits that have become too small to carry the load required and to replace existing 2.5 KV line with 7.2 KV Distribution.

2006-2007 Budget includes preparation for Recycling Services.

**PROJECT JUSTIFICATION:**

Continued expansion of the system, along with load growth has made many old circuits inadequate. Voltage regulation, burned connections and customer complaints require upgrades on a continuing schedule as workload and funds allow.

**PROJECT PRIORITY:** B

**START DATE:** Ongoing **EST TIME TO COMPLETE:** As needed

**OPERATING BUDGET EFFECT:**

NONE

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Build parallel 138 KV tie from Twin Bridges Substation to Prescott Road Substation, with two 12.5 KV underbuild lines for developments adjacent to the route proposed. Also includes a fiber optic shield wire from Prescott Substation to Bayou Rapides Substation to insure adequate control of breakers, relaying, and control of system. Radio communications sometimes get impeded by other entities with frequencies too close to the SCADA frequencies.

## PROJECT JUSTIFICATION:

To allow proper circuit switching, improve system reliability, and permit greater flexibility for CLECO to wheel through our transmission system. The current configuration does not allow adequate redundancy in the event of a failure of the line or equipment tied to it. The added underbuild provide greater switching capabilities in the event of a failure of one or more substations.

PROJECT PRIORITY: A

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Install new SCADA control at Electric Distribution Office.

## PROJECT JUSTIFICATION:

Current SCADA System (Landis & Gyr 6700) was installed in 1988 and is now obsolete. New systems are PC driven, with accessory programs to monitor, track, & forecast load flow, trends, connectivity for outage reporting and many new features that are functioning at other utilities nationwide, but cannot be installed on our present system.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Replace approximately 84 transmission poles in the 138 KV Loop. Original poles were installed in the 1960's and had an anticipated life of 30 years. Most of the engineering has been done "in house".

**PROJECT JUSTIFICATION:**

The 138 KV Loop provides power to all the substations in the system. If 2 sections of the loop are lost simultaneously, many customers would be without power until the 90' and 100' poles could be replaced, which would take too long with existing City crews and equipment.

**PROJECT PRIORITY:** A

**START DATE:** 2005 **EST TIME TO COMPLETE:** 10 months

## PROJECT SPECIFICATIONS

## PROJECT DESCRIPTION:

Install oil containment around oil filled equipment (transformers, OCB) in substation to prevent spills from failed equipment.

## PROJECT JUSTIFICATION:

EPA & DEQ regulations require containment provision around oil filled electrical equipment to prevent contamination of waterways that are subject to run-off from leaks and spills. Affected substations are D.G. Hunter, Willow Glen, Sterkx Road and Prescott Road.

## PROJECT PRIORITY:

A

## START DATE:

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Repaint substation transformers and switchgear at Sterkx Road and Willow Glen Substations. Rusted areas will be sand blasted, filled with sealing material, primed and painted with epoxy paint.

**PROJECT JUSTIFICATION:**

Original substation equipment is rusting out to the point where they leak during rain, allowing water to get on the internal high voltage components. Several insulators have arced over from rain getting into the switchgear, causing serious damage to the bus bars and arc chutes.

**PROJECT PRIORITY:** A

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Replace OCB's with GCB's. Build Distribution Station on adjacent land within Power Plant yard. Convert existing substation to switch yard for transmission.

**PROJECT JUSTIFICATION:**

Existing substation was built in 1964. The equipment and cables are past useful life. All bulk energy moved through the 138KV system goes through this substation. The stability and reliability of the entire transmission system is compromised as this older equipment fails. Three other capital projects related to the DG Hunter Substation can be combined or eliminated by this project.

<b>TOTAL COST</b>	1,110,000		250,000	9,270,000		10,630,000

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

New 138/12470 Substation needed to relieve Prescott Substation and Twin Bridges Substation. New station would have dual 28MVA transformers and 8 potential circuits. Station could start with 1 transformer and be upgraded later as loads demand.

**PROJECT JUSTIFICATION:**

Neither Prescott, Twin Bridges, nor Sterkx Road Substations can provide back up power during peak loading and planned maintenance. Neither substation can safely carry the combined load of both during emergencies. Southwest Power Pool 2011 Model justifies an additional substation to prevent possible blackout caused by CLECO 138 KV failure.

**PROJECT SPECIFICATIONS****PROJECT DESCRIPTION:**

Replace existing pilot communications system with ADSS Fiber Optic Cable.

**PROJECT JUSTIFICATION:**

Existing pilot wire system does not correctly control the transfer trip scheme between substations. In some instances, cascading 138KV outages have resulted from this poor communication. This problem must be corrected on the the City will face fines from NERC for failing to correct a know misoperation.

Excess capacity will be made available for use by other City departments.

**PROJECT DESCRIPTION:**

Replacement and reconstruction of Martin Park Subdivision, Zone 21 gas distribution system for the area from Horseshoe Drive to Spencer Street and from Manor Drive to Mansour Avenue. This project will include a gas regulator station, 2" through 4" mains and new service lines and assemblies.

**PROJECT JUSTIFICATION:**

The existing gas lines in this area are antiquated and leak prone causing a very hazardous situation. This work will upgrade the area's gas system and reduce the probability of hazardous gas problems.

**PROJECT PRIORITY:** A  
**START DATE:** 2005      **EST TIME TO COMPLETE:** 22 months  
**OPERATING BUDGET EFFECT:**

<b>PROJECT DESCRIPTION:</b> Sewer line rehabilitation.			
<b>PROJECT JUSTIFICATION:</b> Repair, reline or replace deteriorated mains, manholes and services that are identified as causing excess infiltration and inflow into the collection system. This project addresses our entire collection system. Increased cost are to ensure EPA compliance in coming years. We have received correspondence for the EPA urging the reimplemention of this program.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Purchase of a payroll time keeping system for use by virtually all City departments.  
Purchase of a centralized cash receiving system to handle all major customer receiving handled by the City.

**PROJECT JUSTIFICATION:**

At present, payroll records are kept at the department level by various means. Payroll hours are then manually entered into the City's computer system by the Accounting Department. A time keeping system would standardize the keeping of the data and enable the departments to enter the data themselves, eliminating the duplication of effort.  
At present, cash receipts are run through the individual computer systems to which they relate; utilities, property taxes, occupational licenses, etc. A centralized receiving system would streamline the process at the cashier window, providing the City with greater efficiency and our citizenry with faster service.

**PROJECT SPECIFICATIONS**

**PROJECT DESCRIPTION:**

Upgrade existing telephone network to be self reliant. Will allow phone communications between all city facilities to continue without interruption in service from Bell South is lost.

**PROJECT JUSTIFICATION:**

Eliminate dependence on Bell South and problems with old phone lines that Bell South refuses to replace. Creates redundancy where a single point of failure will not effect telephone network. All sites will be capable of running on their own without being connected to City Hall. No limitations on voice calls between facilities. All facilities would have features that the central switch has. All future upgrades can be done at once instead of at each different facility. Upgrades can be done without shutting down the entire telephone network.
